The vast amount of fabric options of colour and texture allows you to match to your branding and endless colour schemes. Choices for the discerning buyer include heavy duty fabrics, sustainable accredited fabric, with UV colour stable material used on our outdoor range.

Recognising that the workplace is changing, our portfolio reflects this, enabling your organisation to have a blended approach of collaborative and individual chairs, breakout and task seating. Within this brochure you will find everything to hand to create a dynamic work environment.

SUSTAINABILITY - CARING FOR OUR ENVIRONMENT TODAY, AND TOMORROW

Frem Group is situated in our own purpose built manufacturing plant in Northampton, built and certified to BREEAM 'Very Good' standards. Along with the upkeep and continual improvement of our site, we commit to creating a better environment, and wherever possible, we aim to manufacture products using recyclable materials, or those with a valid chain of custody certification.

Sustainability has always been an integral part of our manufacturing process, and we actively look for new ways to cut down waste, save energy and reduce our carbon footprint.

- We are continually seeking new ways to reduce, reuse and recycle.
- We use minimal packaging, and all pallets are reused.
- We recycle our waste steel.
- We burn waste wood in our certified carbon neutral biomass boiler to heat our buildings.
- We as a British company are passionate about sourcing local materials wherever possible.
- We produce high quality products, durability keeping the products in use for longer, thereby significantly reducing future landfill.
- We use sustainable materials where possible and work in partnership with suppliers who have the same values and beliefs.
- **We are committed.**
